Transmittal Letter of Certificate of Recognition for Compliance, Year 2011

Congratulations for being in compliance with wastewater discharge limits and permit requirements of the Sanitation Districts for Year 2011. The Districts are pleased to recognize your efforts by presenting you with a Certificate of Recognition.

The purpose of the certificate is to recognize industries that are in full compliance with their wastewater discharge requirements. Approximately 575 facilities that are Significant Industrial Users are being recognized for their efforts, including 91 companies who have remained in compliance for more than five consecutive years. The following criteria were used to establish which industries were to receive a certificate:

1. The discharger was required to be a Significant Industrial User (i.e., a discharger with wastewater flows greater than 25,000 gallons per day, a discharger subject to federal categorical pretreatment standards, or a discharger with a capability of adversely impacting the Districts' sewerage system);
2. The discharger received no Notices of Violation during Year 2011. Violations could have included exceeding discharge limits, failure to pay wastewater disposal charges, or noncompliance with general permit conditions (including reporting requirements and Self-Monitoring Report due dates);
3. The discharger was not found to have contributed to equipment failure such as effluent flow meters, sampling devices, pH meters, spill containment systems or rainwater diversion systems;
4. The discharger had appropriate industrial wastewater discharge permits for the facility.

Congratulations again to your receiving a Certificate of Recognition. Additionally, at the suggestion of a sanitation director, we are enclosing, for your use, a removable window display recognizing your achievements. Please continue your efforts in order to maintain compliance during 2012. If there are any corrections that you believe need to be made to the certificate, or if you have questions about the recognition program, please contact Harry Mehta, Senior Compliance Engineer of the Industrial Waste Section, at extension 2903 or e-mail at hmehta@lacsd.org.

Very truly yours,

Grace Robinson Chan
